

5" x 6" x 1.5" belt pouch on Granite Gear Vapor Trail

Materials for 5 x 6 x 1.5" belt pouch:

- 8" x 13" fabric
- 8" #3 continuous coil zipper
- zipper pull
- 2 - 1.5" x 6" elastic
- 2 - .75" x 1.5" grosgrain

Transfer pattern to both sides of fabric.

Pin one half of zipper to edge of fabric right side to right side.

Sew zipper to fabric close to coils.

Fold zipper and seam allowance along stitch line. Sew second stitch line.

Fold $\frac{3}{4}$ " grosgrain in half and pin to edge of fabric about $\frac{1}{2}$ " below back/top line. Tack grosgrain loop to fabric within the seam allowance (folded edge of grosgrain is opposite the fabric edge).

Place elastic with ends about $\frac{1}{2}$ " below back/top line and about 1- $\frac{1}{8}$ " in from edges. Bar tack in place.

Fold elastic at back/top line. Roll raw edge of elastic under so fold lines up with back/bottom line. Bar tack in place.

Install zipper pull for left handed or right handed opening.

Turn pouch inside-out and fold flat, creasing the bottom section exactly in half. Sew edges shut $\frac{1}{4}$ " from edges. Sew over the zipper several times.

Square the corners. Start at the top corners to establish which way the seam allowance is folded.

The corner stitch line should be 1-1/2" long.

Cut of excess corner material (or not).

Turn right side out and you're done.

Pouch on Granite Gear Vapor Trail waist belt.
